Project Update #10

Storm Sewer

The contractor continued to install 42" storm sewer up Cedar Street with completion of two new manhole structures, as well as two new catch basins. The storm sewer work is now complete up through the intersection at First Street.

Embankment Area along HWY 38

Crews have finished grading the trail embankment along the highway. There is still some work to do in the slopes, but the trail corridor itself is ready for to be finished with asphalt millings. The millings were recycled from Cedar Street as part of the project.

Note: Please be on the lookout for additional signage that has been placed on side streets to help discourage trucks from driving down local roads. Hopefully, the addition of these signs will help ease some of the congestion we have been having through side streets.

Thank you for your patience and cooperation as we continue to **Rebuild Tipton**
