#### Project Update #20

##### Water Shutdown Effective Tuesday, April 9th

As we start getting things ready for construction, the contractor needs to shut down the existing water main for approximately half a day. Due to the way the new water main needs to be tied into the existing infrastructure; the contractor will be unable to do it while it is under pressure. The contractor and City employees have been making efforts to coordinate with residents and businesses that will be effected by the shutdown. However, due to the complexity of the configuration in the area between 6<sup>th</sup> and 7<sup>th</sup> Street, it is possible that some were missed.

Today will be spent preparing the area for shutdown so that the contractor can get in and do the work as quickly as possible.

**The water main shutdown will start tomorrow April 9<sup>th</sup>, at approximately 8:00 AM and last roughly half of the day.**

Thank you for your patience and cooperation as we continue to **Rebuild Tipton**
